British Parliament Is Dissolved as MacDonald Loses

LABOR PREMIER TO APPEAL TO VOTERS FOR HIS SUPPORT

KING AGREES TO MOVE IN THURSDAY'S CONFERENCE. OPPONENTS JOIN Carry Motion of Investigation Which Government Treats as Censure Act.

BULLETIN.
[BY ASSOCIATED PRESS]
London.—The House of Commons will be dissolved tonight and a general election will be held Oct. 29. It was announced this afternoon after King George held a private council at Buckingham palace, at which he signed a proclamation proroguing parliament.

[BY ASSOCIATED PRESS]
London.—King George, waited on by Premier MacDonald this morning following the government's defeat in the house of commons last night, agreed to the dissolution of parliament.

Mr. MacDonald left Buckingham palace at 10 o'clock and lasted an hour. It was obviously announced that he had asked the king for the dissolution of parliament in line with his previously announced policy of appealing to the country through a general election to approve the course pursued by his government.

Will Heave Course.
Premier MacDonald will tell the house of commons this afternoon what course he intends to pursue following last night's defeat of the Labor government in the house of commons.

Until he has spoken, the government's method of dealing with the situation will remain a matter of surmise.

The government's defeat came in the form of the passage, by a vote of 241 to 198, of a liberal motion demanding investigation of the "Communist" vote in the cabinet. The motion was introduced by Mr. George Lansbury, leader of the "Communist" group in the house of commons.

During the debate the premier disclaimed any responsibility for the motion of commons for the communists or their policies and announced that passage of either the liberal motion or the communist motion would be taken as a vote of lack of confidence in the government.

It will be the end," he added, "of which members on both sides of the house will agree has been a high adventure of government which I think has contributed much to the honor of our country and to our national stability and when the country has the opportunity of passing a verdict upon it, it will come again."

It was understood that the questions of the resignation of the cabinet were not touched upon at the conference at the palace. The liberal representatives of the press after he had left the king, that dis-

IOWA REVOLT MAY GIVE STATE TO LA FOLLETTE

DANE SOCIALISTS WOULD ABOLISH DENMARK'S ARMY

[BY ASSOCIATED PRESS]
Copenhagen, Denmark.—The socialist government yesterday presented to the Folketing (House of Commons) its dissolution bill virtually abolishing the Danish army and navy and doing away with the military service law.

A corps of guards to assist the frontier and customs guardsmen and police in guarding the boundaries of the country and maintaining order. The corps would consist of only 7,200 men selected from the ranks, and would not be organized as an army unit, but would be replaced by constabulary ships for the protection of national interests within Danish territorial waters.

DISMISS CHARGE AGAINST ONE SON IN BRANDT DEATH

INSUFFICIENT EVIDENCE CITED BY DISTRICT ATTORNEY.
Defense Confident as Case Nears Jury in Marinette Court.

BULLETIN.
Marinette.—John Brandt was acquitted by the jury here today after deliberation of an hour and a quarter.

[BY ASSOCIATED PRESS]
Marinette.—Dismissed with the dismissal of Louis Brandt from the Brandt murder trial, Attorney Ray J. Cannon, defense counsel, told The Associated Press today he believed John Brandt, the remaining defendant, would be freed of the murder charge lodged against him in connection with the death of John Brandt, Sr., after the case goes to the jury, some time today. The elder Brandt was killed in a fire which destroyed a barn on the Brandt farm, near Beaver, more than three years ago.

Closing arguments will be made this morning and then Judge William B. Quinn will instruct the jury which, according to Mr. Cannon, is expected to return a verdict in a short time.

The dismissal of Louis Brandt came yesterday after District Attorney A. P. Murphy moved for his liberation on the grounds of insufficient evidence.

In addressing the jury yesterday, Mr. Murphy branded John Brandt as the one who set fire to the barn in which his father met death. John, however, denied this when he was on the stand in his own defense.

NEGRO LYNCHED BY MOB OF 200 IN CHICAGO STREETS

HEAD CRUSHED IN WITH BASE BALL BAT, THEN TRAMPLED.
ATTACKED GIRL Crowd Gathers Quickly and Police Hold One Man for Act.

[BY ASSOCIATED PRESS]
Chicago.—Otto Epstein, a wine dealer, was held today by the police, accused of leading the mob which crushed the skull of William Bell, 33 year old negro, beaten to death last night by a crowd of 200 men and boys after he was accused of attempting to molest a white girl.

Police reserves, summoned by telephone, seized 20 persons in dispersing the crowd, later releasing all except Epstein, who denied he was guilty and declared he had notified the police a lynching was in progress. Bell was dead when the policemen arrived.

Epstein was accused by George Bell, brother of the victim, and Thomas Clark, negro, who were present at the time but were not molested by the mob. They reported him and seized Miss Greenblatt's arm and started to drag her across the street.

After the policemen arrived the crowd refused to disperse until the quiet was restored after 20 men and boys had been taken into custody.

"Robbing" the City
The saving to the property owners of the city of Janesville by the fixing of the price for sand and gravel used by the contractors has been \$85,000. This is the way the city has been "robbed." What the taxpayers need is a few more "robberies" like this. City management has not added a dollar of debt to the city and has cut the taxes once in the budget and will do it again this year.

WOMAN SHOT BY LOVER IN POOL ROOM
[BY ASSOCIATED PRESS]
Iron Mountain, Mich.—Mary Garwood, 34, formerly of Nelson, Wis., and said to be the apex in a triangular love affair, was shot and killed in a pool room here late Wednesday.

The dead woman fell in the arms of the wife of the pool room proprietor and died instantly. The murderer fired three shots into the body of his victim and fled from a rear door. He later turned the gun on himself and was critically wounded when a bullet entered his body near the heart.

At a hospital here, it was learned that his name was Joseph Zean, 30, and that he was one of the principals in an alleged love triangle.

ZIMMERMAN PUTS INDEPENDENTS ON BALLOT IN STATE

SECRETARY OVER RIDES LEGAL OBJECTIONS TO PROCEDURE.
FOLLOWS DEBATE Candidacy of LaFollette Given as Reason for Official Action.

[BY ASSOCIATED PRESS]
Madison.—Overriding legal objections Secretary of State Fred R. Zimmerman today announced that the presidential candidates were placed on the ballot as a result of legal technicalities.

The decision followed the extended conference between the attorney general and the department of the state in which it was concluded that it would be inadvisable to deny the independent tickets places on the ballots, in view of the independent candidacy of Senator Robert M. La Follette. Reaction on the decision of the California supreme court in barring the La Follette-Wheeler tickets on that state is said to have been one of the main reasons for permitting the candidates to go on the ballots in this state.

The attorney general's department several days ago advised the state department that none of the three independent parties had fulfilled the legal requirements for places on the ballot. Representatives of the workers' party and commonwealth land party were prepared to bring court proceedings to overturn the certification of the presidential names.

The candidates whose names will be certified as result of the ruling followed.

William Z. Foster, Chicago, and Benjamin Gittlow, New York, candidates for president and vice president; the Workers' party, headed by William Z. Foster, Chicago, and Benjamin Gittlow, New York, candidates for president and vice president; the Workers' party, headed by William Z. will be held at the Wisconsin Roof-top, the Wisconsin theater, Audubon, is limited to knights in uniform and their ladies.

One of the features of the convocation will be the convocation of the knights in uniform and their ladies. This is the first time the order has been conferred in full form by a Wisconsin commandry. This event will close the session.

The past commandry association of Milwaukee is in charge of local arrangements.

Eastern Lutheran Convention Opens

Menominee, Mich.—The Eastern Lutheran convention, which is being held at the Menominee Hotel, opened today with the opening service at 10 o'clock.

A general session on tonight will open the conference. Several ministers from the Eastern Lutheran district will be the leading figures at the opening service. The convention will continue through Sunday.

The meetings on Friday and Saturday will be devoted largely to business, and on Sunday large meetings will feature the convention. Sunday morning, the Rev. M. Baues, pastor of Green Bay, will preach the opening sermon and the convention will be administered. Each session of the conference will be conducted in both the Norwegian and English languages.

Uninvited Visitors.

Many distinguished visitors of the order from sister jurisdictions have signified their intention to be present, among them the Most Excellent Grand Master Leonard L. Newby, Sir Knight Newby is the head of the national order of the body, the Grand Encampment of the United States, Right Excellent Sir Kenneth M. Landahl, grand commander of Illinois, will pay Wisconsin an official visit. A battalion of four companies and a military band of 100 pieces from Chicago will act as his personal escort.

On the afternoon of Oct. 14, the grand parade will take place over the principal streets of the downtown section of the city. It is anticipated all commandries of the state will be present and that there will be 2,000 members of the order in line. After the parade, competitive and exhibition drills will be held at the cathedral. A special feature of which will be a musical drill and dress parade, participated in by 12 complete companies and a band. The drills are open to the public.

department of agriculture, is not taking any part in the defense of the president. It is stated that Mr. Wallace has on a recent visit here told friends that he did not intend to stay in the cabinet after such a host of these farm editors keep their ears to the ground. It is important to their magazine circulation. And they are endeavoring to voice the protest of the farmer by season and out of season. Discretion makes the Wallace periodical more or less neutral as between the views of Iowa farmers and the record of the Coolidge administration. Incidentally Secretary Wallace is credited with writing the farm plank in the republican platform. That platform commits the party to an endorsement of "Principles of the McNary-Haagen Bill." But the president has not seen fit to do that yet.

TEAM 13 OF T. N. T. FIRST IN RECRUITS

Robert F. Buggs Captains First Honor Unit in "Y" Campaign.

Team 13 of the "T. N. T. Gang" won first honors in town recruiting for the "Y. M. C. A." new building campaign when Captain Robert F. Buggs filed his signed list of workers at the campaign headquarters in the "Y" building yesterday morning. Manager Chas. Toulton and his associate, Ed. Amerphol of the "T. N. T." division are being congratulated upon having produced the first completed team for the campaign organization of one hundred and fifty business and professional men. Team 13 will receive a subscription prize of \$750 to be credited in their first report on the opening day of the campaign.

The "first honor" team is made up as follows: Robert F. Buggs, captain, William McCue, lieutenant, E. W. Root, Luther L. Mills, Ralph L. Morse, James Zambis, Harry O. Kennedy, Carl Safady, and L. O. Cherbonnier.

A luncheon of team captains and division managers will be held at the Y. M. C. A. tomorrow noon to report progress on recruiting and discuss the final stages of the campaign. Campaign Director E. L. Mogge will be in charge of the meeting.

The Lions club of Janesville heartily endorsed at its meeting yesterday noon the campaign for the Y. M. C. A. new building and many of its members will serve in the campaign organization. The presentation was made by Bernard M. Palmer.

The resolutions adopted were as follows:

Whereas, recognizing the need in our community of a modern, properly equipped building for the use of the Young Men's Christian Association, and

Whereas, we regard the work of the Y. M. C. A. as a desirable adjunct to our community life, and

Whereas, the Y. M. C. A. board of directors after deliberation and thorough consideration has formulated plans for a building campaign of \$750,000 to raise approximately \$275,000, therefore,

Be it resolved that the Lions club of Janesville endorse this civic enterprise and as an organization

LABOR PREMIER TO APPEAL TO VOTERS FOR HIS SUPPORT

(Continued from Page 1.)
solution had been decided upon, Mr. MacDonald said:

"I am sorry events have turned out as they have but every one knows the situation is not one of the government's seeking but has been forced upon it. Personally I should have been very glad if the labor government had been allowed to carry on its policy, a policy which I maintain has been one of honest politics."

The premier said the government would have preferred to have saved the country the expense of another general election but, shrugging his shoulders, he added: "That is the situation and there it is."

Mr. MacDonald after leaving the palace, returned immediately to Number 10 Downing street for a cabinet meeting.

The announcement of the date for the election, which will define the political complexion of the government, that will succeed Great Britain's first labor ministry, was made after Prime Minister MacDonald, coming this afternoon before the house which last night defeated his government, declared the king had assented to his request for the dissolution of parliament, which will be prorogued tonight.

LABOR PREMIER TO APPEAL TO VOTERS FOR HIS SUPPORT

(Continued from Page 1.)
solution had been decided upon, Mr. MacDonald said:

"I am sorry events have turned out as they have but every one knows the situation is not one of the government's seeking but has been forced upon it. Personally I should have been very glad if the labor government had been allowed to carry on its policy, a policy which I maintain has been one of honest politics."

The premier said the government would have preferred to have saved the country the expense of another general election but, shrugging his shoulders, he added: "That is the situation and there it is."

Mr. MacDonald after leaving the palace, returned immediately to Number 10 Downing street for a cabinet meeting.

The announcement of the date for the election, which will define the political complexion of the government, that will succeed Great Britain's first labor ministry, was made after Prime Minister MacDonald, coming this afternoon before the house which last night defeated his government, declared the king had assented to his request for the dissolution of parliament, which will be prorogued tonight.

No Added Debt to the City.

Janesville approaches the time when the budget for the coming year will be presented to the council and that is always an interesting item of news to every taxpayer in the city. In fact it is of vital interest to every citizen whether on the tax rolls or not, since in one way or another everyone pays taxes.

Last year the tax rate was reduced for city purposes about a dollar as against the 1923 budget made up in the fall of 1922. The total lessened cost was \$40,000. We have added no debt to the city but have reduced it considerably during the past year. It is being reduced right along. It may be remembered that the city debt has increased a million, two hundred thousand dollars in the period from 1918 to 1922. Not a dollar of sewer bonds against the city have been issued since the city manager government went into office. No added debt was made for the paving this year. We have built four miles of storm sewer at a saving of some \$50,000 for the city by having the city do the work. We have saved thousands of dollars in purchases of coal, supplies for the several departments and in the general operation of the city's business.

There are more items of saving in the city record which are for the benefit of the taxpayers. We have the paving which we have needed for forty years and which should have been done long ago, a little at a time and saved the frontage cost to so many property owners at one time. But it remained for the city manager government to do this job this year, connecting up the system until we can drive 23 miles on paved streets.

When the budget is made there will be no addition in taxes levied for city purposes. That seems assured and the city manager is confident that a cut can be made of at least \$30,000 as against the record of last year, with a total reduction of \$2 a thousand in the year and a half of city management. That represents saving by service; this, too, in the face of the homestead exemption law which reduces the taxable valuation of the city more than a million dollars. All of which should be a source of gratification to the citizens of Janesville regardless of whether they were for the city manager plan or not.

Five hundred persons have been killed by motor car accidents in Chicago so far this year. Just a trifle ahead of the deaths by murder, but the year is still young.

Sauce for the Goose but No Sauce for the Gander

Autocracy ruled in California when the court refused to permit the La Follette electors to go on an independent ticket. That was the charge of the leaders for the Wisconsin senator in that Pacific state.

The Gazette has said and repeats the statement here, that it was an error, since the fact that a petition with some 50,000 names had been filed was a sure enough demonstration that the voters wanted La Follette where they could vote for him. Then in Louisiana there was a refusal to allow the electors for La Follette to go on the ticket which again seems to the average citizen to have been a foolish thing to do. So a great howl followed from the La Follette committee.

They were fully justified in being angry about it. But this does not justify, palliate or excuse, under any plea the action taken by the attorney general of the state of Wisconsin, who is also attending to the legal side of the elector cases for the Wisconsin senator, to refuse places on the ticket of presidential electors for independent party nominations in Wisconsin.

If it was wrong to leave off La Follette in California it was equally wrong in Wisconsin. If it was sauce for the goose in Louisiana it was sauce for the gander in Wisconsin. But we have a different law in Wisconsin which is always handy to fit our peculiar cases and there is no day in court for the opposition here. "Take it or leave it," is the phrase of the attorney general.

This inconsistency of action and protest will not materially aid, even in this state, to help the La Follette candidacy. Law was not made to keep off candidates but rather to decide the form and manner in which they may be presented to the citizens for voting. Whenever political trickery is resorted to or law is made to serve the purpose of political sharp practice, it is a defiance of the rights of voters, and this is true whether in California, Louisiana, Michigan or Wisconsin.

Evidently some one turned a nose on the Davis blaze of glory which burst forth after his nomination.

To Anxious Inquirer, we may say that we do not believe that Brookhart's name has anything to do with the heart that pants for the water brook.

The peanut crop is extra large which is a good thing since so many of them are used in politics this year.

When a fund is collected by the republicans for campaign purposes, it is a "slush fund." When it is collected by Senator La Follette's friends for campaign purposes it is perfectly all right and the collection plate wears a halo.

While it may be true that money can aid much toward happiness yet there are plenty of things that money cannot buy. If we keep worrying all the time about the things we cannot get because we haven't the money, we may overlook a lot of things which cannot be bought over a counter.

THE AMERICAN GOVERNMENT

XII—The Geological Survey.

By FREDERIC J. HASKIN.

(Continued from Wednesday.)
Of parallel importance is a similar huge topographic map. A separate division of the survey makes this. Topography is the science of the actual surface of the earth, rather than what lies below. Mountain, valley, and stream are shown on the topographic map in minute detail. Every hillock, rivulet, and physical characteristic is indicated. Even the locations of buildings and other works of man are shown. Over 40 per cent of the country has been so mapped.

Aside from its value as a base for the geologic work, the topographic map has come to have a high value as a ground-work for all engineering, such as railroad and highway construction, bridge building, and the location of other edifices. It is the one great authority on the surface of the United States. The map is projected on a scale of 1 mile to the inch in the more thickly settled regions of the United States, approximately two miles in other sections, and four miles to the inch in Alaska. This also is published in separate sheets which will number between 6,000 and 7,000. A surveying party is able to cover from 200 to 500 square miles in a season in making this map and the cost of the work ranges from \$15 to \$50 a square mile, according to the refinement of the work and the nature of the country.

XIII—The Patent Office

Although the patent-right system had its inception in England it has rendered the greatest service to the people of the United States. The life of the founders of the American nation inspired ingenuity with the need that the American and ingenuity have shown the most prolific inventive genius in the world. Of all the patents that the civilized nations have issued nearly one-half or 1,452,000 have been issued by the United States Patent Office.

With remarkable foresight, the framers of the constitution inserted a clause in that document which went far toward the encouragement of inventive genius among Americans. It was a clause insuring to inventors exclusive ownership of their patent rights for a term.

The genius of invention came with the western empire builders to Jamestown and Cape Cod. In subsequent years it was stimulated by the hard life of the wilderness. As early as 1641 the colony of Massachusetts granted Samuel Winslow a patent for a new method of making salt. In 1646 a patent was granted to Joseph Jenks for "an engine for the more speedy cutting of grass."

"This engine" was nothing more than an improvement on the old-fashioned mowing scythe, but it was the first of a long series of American and cultural implements and machines which have revolutionized the farming industry of the whole world.

As new machines are invented and patented, their use begets a new progeny of invention. The cotton gin was followed by many improvements. The reaper and binder, threshing machine, typewriter, and adding machine were each the precursor of a whole new cycle of inventions.

Acting out of the necessities of the situation, the first congress passed a law creating a patent commission composed of the secretary of state, the secretary of war, and the attorney general. Three months elapsed before the first applicant for a patent appeared. Samuel Hopkins was granted a patent July 31, 1790, on a new process for making pot and pearl ashes. Three years later the secretary of state became the head of the patent system.

Since that time American inventions have led the world in number. Last year over 40,000 patents were granted and more than 13,000 trademarks registered. The fees collected were over \$3,000,000. It has been necessary to surround the law with many safeguards to prevent the overlapping and duplicating of patented ideas. Therefore, not all applications result in the issuance of patents. It may be discovered that the principle of a new invention has been patented already and the application must be refused unless there is some radical difference which makes the invention new, novel, and useful—the general rule for everything patentable.

The patents issued cover the entire range of human ingenuity. Each decade brings some epoch-making basic invention, which in turn brings others in its train. The invention of the automobile has probably produced the greatest number of collateral inventions. Aside from the many new features which have been added to the automobile, engine itself, to bearings and other mechanical equipment, there have been thousands of accessories and attachments—useful, whimsical, ornamental, and luxurious. From the old rubber bulb horn came the present mechanical siren. All the locking devices for cars and tires, lights, wind guards, shield wipers, mirrors to show who approaches from behind, foot warmers, hand warmers, bumpers, snubbers, ornamental radiator covers, would not have been invented had not the automobile first been produced. The necessary business is now a great industry in itself. Thus wealth is produced in a nation, while the patent right gives the individual inventor a reasonable prior right to the enjoyment of the profits of his ingenuity.

The era of aircraft started another cycle of this sort and devices constantly are being patented for use on airplanes and dirigible balloons. The fact that it is in the air has sprung up in the wake of the invention the radio and a number of devices are constantly being invented to improve communication.

Indirectly the development of American inventive genius has been due to the fostering care of the patent office. It has been estimated by economists that two-thirds of the national wealth is the product of inventions. Great industries have been called into existence under the patent system and have given employment to millions of people, paying them wages and salaries amounting into the billions. The electrical industry is perhaps the best example. In approximately half a century the activities of inventors in the electrical field have resulted in the filling of patents which have built up an industry with a total investment not far short of \$10,000,000,000.

There are 60 general divisions in the patent office under which applications for patents are filed and all the known arts are made. These general classes are each divided into subclasses and there are many thousands of subjects upon which patents are issued. Every applicant for a patent pays a stated fee of \$10. This, with the other receipts of the patent office, has created a net surplus of over \$8,500,000. In spite of the vast benefit conferred upon the nation by inventors, they have been taxed \$8,500,000 more than it has cost to maintain the American patent system.

A great celebration was held in the city of Washington in 1921 in honor of the first centennial of American patent history. Four hundred and fifty thousand patents had been issued up to that time. Statesmen, inventors, and publishers were enthusiastic in boasting of the achievements of the century. Since that time only 32 years have passed, yet in these years more patents have been granted than in the full century before. In 1921 congress made an investigation of the wage problem, which showed that the average mechanic was then getting twice as much as his predecessor in 1840. By the outbreak of the great war this wage scale had again doubled. Now it has redoubled.

JUST FOLKS

By EDGAR A. GUEST.

WHEN THE BABY WAKES

When the baby wakes from sleeping
There is laughter in her eyes
And no hint of last night's weeping;
Earth has heard no sweeter cries
Than her gurgling and her cooing
As she greets another day;
Age must smile to greet morning,
But the baby wakes to play.

When the baby wakes from slumber
There is sunshine on her cheeks
And no shadow of last night's number,
It is music when she speaks,
And the way she shouts her gladness
Drives all thought of grief away;
Age must sometimes wake to sadness,
But a baby wakes to play.

Life is good, and well I know it!
Or my babe would wake to sigh.
In some dim way she'd show it
As the days go slipping by.
When the morning sun comes shining
She'd not clasp her hands that way
But, like us, would start repining
At the burdens of the day.

When the baby wakes, there's never
Any sudden thought of woe;
Last night's tears have dried forever,
Here's a face with joy aglow!
Here's the day you call tomorrow,
You can almost hear her say:
Age may sometimes wake to sorrow,
But a baby wakes to play.

HOROSCOPE

FRIDAY, OCTOBER 10, 1924

The Sun in benefic aspect dominates today, according to astrology. Jupiter, Saturn and Uranus are adverse.

Stimulation and encouragement for all who carry heavy responsibilities or cherish high ambitions appear to be assured under this rule of the hour.

It is a most favorable day for all who occupy places in the Sun, since the aspect promises for them the support of the people.

All the nations should be attentive to persons who hold the reins of power, whether in finance, politics or diplomacy.

Under this planetary government it is wise to promote enterprises, postponing any actual initiative until later.

This should be a fairly fortunate day for those who deal with banks as financiers are supposed to be helpful under this rule.

Lawyers are subject to a rule not favorable and members of the legal profession will be much criticized.

Real estate should be handled with special care in many parts of the country, for there may be difficulty in swinging big projects.

Agenda mining difficulties loom large on the horizon and the winter may bring serious trouble.

Labor in this country as well as other parts of the world will be dissatisfied with conditions and will make important moves toward domination.

Uranus continues in a place that is menacing to the brain and the will power. The use of drugs will spread despite effort to prevent the growing evil.

Men and women should not indulge in sentiment today as they may be easily deceived and entangled into unwise alliances.

Persons whose birthdate it is may have rather a troublesome year. They should make no changes, but stick to present activities.

Children born on this day may be care-free and inclined to extravagance, but these subjects of Libra usually have great technical ability and succeed as mechanics, printers and decorators.

UNCLE SAM A BUSY COINER

The bulk of the year's work, numerically, at the mint in Philadelphia, consisted of 58,704,000 standard silver dollars, struck to replace those melted in 1923. The year's output of gold coins in the East Indies. Other coinage included 1,597,000 gold eagles, 638,000 dimes, 12,049,000 pennies and 1,431,000 nickels. The coinage for Peru included one million 1-60 silver pieces and two million 1-120 silver pieces. For Nicaragua the output was 15 million 1-centavos and 400,000 half-centavos.

Some of our readers may not know that the United States government does coining jobs for other countries. The mint at Philadelphia is enough to have a mint of their own. The work is done at a small profit.—Scientific American.

Personal Health Service

By WILLIAM BRADY, M. D.

Noted Physician and Author.

Dr. Randall Henderson of Sheffield Scientific school, Yale university, is perhaps the foremost authority on resuscitation and certainly the contributor of the most valuable addition to our knowledge of that subject since Shafter taught us the most effective method of artificial respiration. Professor Henderson, in a recent article in the report on the latest progress in the treatment of asphyxia from carbon monoxide, ether, alcohol and other volatile poisons, professed his remarks with these significant words:

"Others are to deal primarily with the topic of artificial respiration. I will merely add my testimony to the value of the report on the latest progress in the treatment of asphyxia from carbon monoxide, ether, alcohol and other volatile poisons, professed his remarks with these significant words:

ASK US

(Any reader can get the answer to his question by writing to the Janesville Daily Gazette, 201-204 E. Milwaukee St., Janesville, Wis. The editor will endeavor to get them. Make this your column, if any questions are in your mind the Gazette will answer them.)

Q. How many national pitchers were there last year when the baseball rules were amended so as to do away with spitball pitching?

A. Seventeen pitchers were put on the exempt list. Those who were allowed to continue the use of the spitball were: Doug, St. Louis National; Douglas, New York National; Philbrick, Boston National; Fisher, Cincinnati; Goodwin, St. Louis National; Grinnell, St. Louis National; Hendrix, Boston National; Ayers, Washington; Caldwell, New York American; Covelsky, Cleveland; Fisher, Chicago American; Leonard, Boston American; Quinn, New York American; Russell, Boston American; Shecker, St. Louis American; Sotter, St. Louis.

Q. How many men in the United States have an annual income of \$1,000,000 or more?

A. Personal tax returns for 1922 showed 67 persons reporting income in excess of \$1,000,000 as compared with 23 persons for 1921.

Q. What is the difference between the membership of a state bank and a national bank in the federal reserve system?

A. The membership of a state bank is voluntary and one from which it can at pleasure withdraw. If a state bank desires to withdraw from the system it has simply to send formal notice to the federal reserve board and proceed independently. The only way the interest central to a national bank can be withdrawn from the system is by the bank going out of business as a national bank.

Q. What is the meaning of the word "chevron" in heraldry?

A. Goat rubbers of the southwest have adopted the use of this word to designate goat meat. Just as a police signifier meat from the hog, and the word "chevron" in heraldry, the word chevron was made by combining parts of the two French words, "chevre" meaning goat, and "montain" meaning mutton.

MY FRIEND, I ESTEEM IT A PRIVILEGE TO HONOR AN A GREAT PRIVILEGE.

Remember when we used to meet when the other had a political meeting, and say, "There was only two or three hundred listened to the speech, and they were mostly women?" These judges who are so consistent with erubescence "cause they still hope should remember that the boy of today is about twenty years older than the boy of yesterday.

Dinner Stories

Two young women, evidently strangers to each other, were seated at the same table in a popular restaurant. One of them had finished her chair and it was empty.

The other seemed to resent this and said, "I suppose you do not object to my eating while you are smoking?"

The first girl looked at her and answered brightly: "Well, no, not so long as I can hear the orchestra."

The harassed-looking man was rushing hither and thither round the

store in a state of wild excitement. He went up to the top floor and down to the basement.

Finally, he had arrived on the ground floor, looking hot and flushed, when he was approached by a polite doorwalker.

"Are you looking for something in men's clothing?" inquired that individual politely.

"No, no," roared the excited one, "not men's clothing—women's clothing! I've lost my wife!"

A traveler in Ireland once hired a cab to take him into the country, and had not proceeded far when it pulled up at the foot of a steep hill. The driver appeared at the door.

"What are ye at man?" said the traveler; "this isn't where I ordered you to stop."

"What, yer honor, what?" ejaculated the driver. "I'm only doin' the best. If I bang the door he'll think I've lost my wife!"

Electrical Home!

Boys and Girls—Learn More
About Correct Lighting

On October 15, the "Model" Electric Home, located at 933 Prospect Avenue, will be opened to the public. This is similar to the home that some boy or girl in the United States or Canada will win in the Home Lighting Contest.

Come and see what a valuable prize it is.

If you have entered the Home Lighting Contest—and you surely should by now—an inspection will show you how a home should be lighted.

Boys and Girls, you may get an idea that will win a prize for you, so don't fail to visit the home. Remember the day of opening, Wednesday, October 15.

There is no admission fee. Nothing is for sale. We just want to show you what real comfort there is in a correctly lighted, wired and furnished home.

To get to the home take Milton Ave. street car and get off at Prospect Ave. Walk one and one-half blocks east.

WORLD SERIES ACTION—SAFE AT HOME!

Here is one of the high spots in the third world's series game between the Giants and Nats. It occurred in the second inning: Travis Jackson, Giant shortstop, is scoring on a wild pitch by Marberry, Washington pitcher.

The latter, shown at the right, made a vain effort to tag Jackson after he had recovered the ball and thrown it to him.

Beloit Alumni Gather Saturday

Many Janesville alumni are expected to be in Beloit Saturday for the homecoming celebration of Beloit college, that will be featured by the football battle with Carleton college.

The program opens Friday night with a "pop" meeting in the gymnasium. A meeting of the alumni council will be held Saturday morning and at 1 p. m., the parade to Hancock field starts, with the game at 2:30 p. m. Fireworks and stunts will be a feature between halves. Dinners will be served at fraternities homes, there will be a huge bonfire in the evening, followed by a mixer in the gymnasium.

SPEAKS BEFORE EVANSVILLE HIGH

Evansville — H. C. Buck, Madras, Ind., who is home on a furlough, spoke before the assembly of the high school Wednesday morning. Mr. Buck, whose home is in Pennsylvania, has been in India for five years as a Y. M. C. A. worker and is adviser in physical education to the Madras government. He had charge of the India team that competed in the Olympic games this summer.

PRESENTATIONS ON APOLLO PROGRAM

Stage presentations will accompany each moving picture bill at the Apollo theater in the future, according to Manager James Zankas, the first being given this week by the Verona sextet. The sextet is composed of six young women who pre-

sent a pleasing and versatile musical program. Vocal solos, instrumental numbers on the piano, saxophone, violin and drums, and dance numbers comprise the program. Throughout the presentation is one of the high caliber.

Political Notes

Mr. H. M. LaFollette, speaking in Philadelphia, attacked President Coolidge's veto of postal carriers' salary raise and his advocacy of the Mellon tax plan.

Governor Bryan, in Oklahoma speeches, extolled Bryan as the only man who "could put this government back on an honest and efficient basis."

Z. S. participation in the league of nations was urged by Mrs. Carrie Chapman Catt before the New Jersey Federation of Women's Clubs. "We are a race of consummate fools if we ever go to war again," she said.

President Coolidge returned to his advocacy of the development of Colorado river resources by the government, in a note to officials of the California Coolidge-Dawes campaign committee.

James Dacey, Northampton, Mass., co-leader-philosopher friend of Coolidge, spent nothing in getting the republican nomination for the legislature.

General Daves is in Wyoming on his speaking tour. He will return via Nebraska.

Pennsylvania's democratic state central committee joins LaFollette in demanding investigation of alleged republican slush fund.

Milton Playing

De Kalb Thursday

[BY ASSOCIATED PRESS.]

Milwaukee—Four Wisconsin colleges not attached to any conference will get into action this week in as many football encounters. The most interesting of these games from a Wisconsin angle is that of Campion college against the Wisconsin Mining school Saturday, which will have more or less, the effect of deciding the southwestern Wisconsin college football title.

Thursday—Milton college at De Kalb, Ill., tomorrow college.

Saturday—St. Norbert's college at Oshkosh Normal school.

Milton college already has suffered one defeat, when it failed to score against the strong Whitewater Normal school eleven which garnered 16 points. Its chances against DeKalb are not promising, but with the added experience which additional practice will bring, the school may be counted upon to give a good account of itself.

Blue 2nd Team

to Meet Beloit

Janesville high school second football team plays its first game of the season, meeting Beloit's seconds at the fair grounds here at 10:25 a. m. Saturday. Beloit has a number of old stars back on its seconds and will give Coach John Gross's Blue outfit a hard run. At the same time, the way in which the seconds have been battling the Janesville regulars, they should make a great showing. The Janesville line is considered stronger than that of Beloit's and the backfields are about even.

Testimony taken in the trial of Warren Lincoln at Geneva, Ill., to the effect that he is insane and was so at the time he killed his wife, continued today.

\$15,726,747 PAID TO SERVICE MEN

Recognition Board Figures Show Large Sum Given War Veterans.

[BY ASSOCIATED PRESS.]

Madison—A total of \$15,726,747.91 was paid out by the service recognition board to former service persons up to July 1, when the board was replaced by the soldiers' rehabilitation board, a summary of activities of the previous body announced today by Ralph M. Inghel, adjutant general, shows. Claims were allowed to 114,792 ex-service men.

A total of 130,000 claims were filed with the board, the summary shows, slightly over 18,000 being refused. Claims allowed as result of a test case entailed to the supreme court numbered 2,255.

The average claim paid to former service men was \$137, according to the summary, while the average length of service as indicated by computation of bonus payments was 13 months and 21 days.

The cost of administering the service recognition act was \$140,000 and the average administrative cost per claim was \$1.07.

Under the state educational bonus law for former service persons, a total of \$320 claims have been allowed, the department reports, and expenditures made amount to \$4,075,087. The number of free correspondence claims granted was 6,114.

Outlaw War, Support League, in Conference

Beloit — Pledging its unqualified patriotism but declaring that war as a way of settling disputes between two nations must be made a crime by the laws of nations, 500 ministers and laymen of the Wisconsin Congregational conference took a positive stand on the peace and war issue in their eighty-sixth annual convention here Wednesday afternoon.

The conference placed itself on record as unequivocally in favor of the proposition that the war system be outlawed and abolished.

The conference adopted without debate, one clause which declared: "We are resolved to support no war in the future solely because of the dictum of the state."

"We must demand that the Christian conscience shall be able to find no other alternative under the circumstances," the resolution concluded.

Indorsement of the League of Nations and world court was also given.

The original resolution, as presented to the conference, contained a sentence saying, "We are not unconditional pacifists," but there was objection to this on the ground that it was confusing, and the offending phrase was stricken from the resolution.

The conference urged upon the Congregational Education society that it prepare and introduce to sons on world peace and that there be made a part of the church's religious instruction. It also recommended that the state board of education prepare textbooks for use in public schools "that shall emphasize the art and achievements of peace more than those of war."

The 1923 conference was awarded to Appleton.

Insurance agents are meeting at Green Bay today.

IS THE U. S. A CHRISTIAN NATION?

COMMENT ON THE ENIFORM INTERNATIONAL SUNDAY SCHOOL LESSON FOR OCTOBER 12, 1924.

Read Matthew 5 and 6.
WM. SOUTHERN, JR.

There is a magazine published in Russia and given wide circulation which devotes its pages to propaganda against the idea of God. It ridicules religion and denounces with equal fervor the Christ of the Christian, the God of the Buddhist, the Mohammedan and all other religions which pre-suppose a God.

In connection with the magazine there is a big room where is kept a museum of Christian superstitions represented by Bibles and crucifixes, and all kinds of tokens taken from men and women who have renounced the Christian religion. In the army of Russia atheistic materialism is taught. The army service is compulsory and at once the young man is brought under the influence of keen minds. His religion is laughed at and his God declared a superstition. He is told that he may pray if he wants to, but that he will soon get over such foolishness. He sees men all about him who do not pray and who revile the idea of a God and when he watches for them to be struck dead and nothing happens, the work of the propagandist is well begun.

We claim to be a Christian nation in the United States and we are a Christian nation. We should be able to take a lesson from the methods of Russia in religion. Russia declares that there is no God and that all worship is superstition and proceeds to teach this doctrine. It will only require a generation to carry out the program. The United States claims to be a Christian nation and proceeds to teach all about God, and to pride itself in letting people believe we are wearing away from the ideas upon which our government was founded. We are taught to be prosperous to be a Christian nation. We go too far when we refuse to teach Christian history.

After Jesus had been preaching and teaching the Kingdom of God for more than a year his disciples began to ask questions about certain specifications. Like all of us they wanted some specific rules to follow. In response to this Jesus delivered the greatest sermon ever spoken. He stood beneath the trees on a mountain side, in the open air, the birds singing overhead and a little group of followers gathered about him. The text of this sermon is found in the 5th Chapter of Matthew's Gospel. If it were delivered today by a great leader in this country he would be denounced by a horde of newspapers as a pacifist, unless he put quotation marks about it and told where the original text should be found.

The sermon is perfectly logical and each section follows the other in sequence. First comes the beautiful teaching which tells us what constitutes real happiness, then the place in the world of those who achieve these teachings. After that is a declaration of service and obedience to law and the real discipline.

After listening to the sermon and taking it over the disciples asked about prayer and Jesus gave them what we call the Lord's prayer. It is simple, beautiful and all-comprehensive. In the early church a recitation was that this prayer be repeated at least three times a day. I wonder how many of those who read this can repeat the Lord's prayer without a mistake? Some years ago such a suggestion would be repeated and it would be considered rather disgraceful to be unable to repeat this wonderful prayer. I am not willing to comment further than the suggestion.

Prayer is instinctive in the human heart. All of us have an inner voice. Russian materialists can not eradicate this. The intellectual may accuse his head off about the superstition of prayer, yet poor human nature, ignorant or educated, must instinctively do pray. The Jew prayed to a tribal God and Daniel in Babylon prayed from his window toward Jerusalem. The Moslem prays as the hour strikes, no matter where he may be. A prayer wheel is used in Tibet. The Navajo Indians weave a prayer in their blankets. The common design of a Navajo blanket is a prayer for rain. Prayer is the soul's sincere desire unuttered and unexpressed. I believed thoroughly in prayer and in an answer to prayer. I have all the proof I need, but I can not demonstrate how God answers prayer. I believe it is possible for all the prayers from all the people of all the nations, rising toward the throne at one time, to be heard by God.

Jesus warns us about praying for effect. He points out the man who ostentatiously closes his eyes and

utters long prayers so that others may see him and understand how good he is and how confidential he may be with God. Jesus said this man has his reward in being seen. I believe in prayer because I believe in God. If there is a God who created all things, who made the universe and placed us upon it, who gave us all the things we have and the wisdom to draw from his inexhaustible stores, then he will not fail to leave us a channel of communication. Prayer is that channel. If you believe in God you must believe in prayer.

I believe in prayer because I have seen it operate in the lives of some of the best and the wisest people I have ever known. The greatest men and women in history were praying men and women. I maintain that this United States is a Christian nation. Our first president was a man of prayer and at the entrance of his tomb to which many thousands go every year as a sacred pilgrimage, is inscribed as follows: "THE TEXT OF THE NEW TESTAMENT IS WRITTEN THERE: I AM THE RESURRECTION AND THE LIFE. HE THAT BELIEVETH IN ME THOUGH HE BE DEAD, YET SHALL HE LIVE."

Statistics show that less than one half the people of the United States are members of Christian churches. Some argue that this demonstrates that the United States is not a Christian nation. I hold it is a Christian nation and that 90 per cent or more of our whole people believe in God. An Atheist could never be elected president of the United States. If we had the same zeal for Christianity the Russians have against it, the promises contained in the Sermon on the Mount would be ours.

Good Thing to Know about stopping a cold

At the first sniffle take a stiff dose of Dr. Caldwell's Syrup Pepsin, a cold congestion and avoid a cold

THE commonest afflictions of mankind are constipation and colds. Combined they indirectly cause the majority of untimely deaths. It is when constipated that you are most subject to colds, so keep the bowels open.

Sneezing is almost always the first warning of a cold. Don't wait; don't hope that it will go away of itself. Take a spoonful of Dr. Caldwell's Syrup Pepsin, cleansing the intestines of accumulated poisons, bundle up warmly and the cold will be gone by morning. Colds cannot "run their course" when stopped at the outset. That spoonful of Syrup Pepsin may stop it.

A good laxative is a necessity in the home. Since Dr. Caldwell's Syrup Pepsin is the largest selling liquid laxative in the world, over 10 million bottles being sold annually, the majority of families must prefer it.

And rightly so, for in the 30 years it has been on the market it has relieved thousands of people of the ailments it was designed to remedy, such as constipation, biliousness, indigestion, flatulency, sour stomach, dyspepsia, bad breath, fevers and colds. It will relieve any disorder associated with constipation. It is the safest, most gentle intestinal treatment you can get. Mr. J. C. Boney, 969 Main St., Biloxi, Miss., and

Mr. Walter Duminske, 797 Wheelock St., Detroit, Mich., are never without a bottle in their homes. They attribute their uniform good health to having it handy when needed. You will find it in every drug store. A dose costs about a cent.

There is no secret about the contents of Dr. Caldwell's Syrup Pepsin, and you will find it stated on the package, a vegetable compound of Egyptian senna with pepsin.

Nurses' Costume**

The nurse spends most of her time in her uniform, and being a woman, she wants to look well in it. Her costume must be correct, it must be dignified, it must have the latest utility features, but also it must be becoming.

And that explains in a few words the popularity of Paul Jones Nurse's costumes. They are professional, yes, but they are also charming and they also express quality.

Style as illustrated here, a straight line uniform, made of fine quality English poplin, a costume that will conform to your idea of dignity, at
